## And Briton Says Oswald Isn't in Grave

FORT WORTH, Texas — A British author, who claims he has proof a Russian imposter is lying in the grave of Lee Harvey Oswald, is requesting an exhumation of the body buried in a Fort Worth cemetery. U.S. District Judge James E. Wright took the matter under advisement yesterday. Author Michael Eddowes contends certain physical characteristics found on the body differ from data recorded by the Marine Corps about Oswald, known as the assassin who fired the shots from a window of the Dallas school book depository that killed President Kennedy.
